## Bits and Bytes

Prerequisite: Know Binary and Hex. View previous document, "Binary, Decimal, and Hex" for help.

## Bits

A bit (short for "BInary digiT") is the smallest unit of data in a computer. The bit can be represented by a 1 or 0 . A single bit can be used to represent on/off or yes/no but a string of bits can represent complex data.

For example, computers run on electricity, so when a computer wants to send information from one place to another it sends these "pulses" of electricity over a wire. A higher voltage pulse will mean a 1 , and a lower voltage pulse will mean a 0 . But there are other parts of a computer that still use 0 s and $1 s$ that aren't electric, like the hard drive. The hard drive stores 1 s and 0 s by changing the magnetic poles of small parts of a metal disk. Positive and negative charges would be 1s or 0s.

A nibble (sometimes spelled nybble or nyble) is a string of four bits. Nibbles can be used to represent a single hexadecimal digit as there are exactly 16 combinations between those four bits.

## Bytes

A byte consists of 8 bits, sometimes also referred to as an octet. A byte generally comprises 8 bits that represent a letter in the alphabet, a single digit number, a punctuation mark, or other character.

So how exactly does a byte hold information? For example, ASCII tables are used to translate a byte to a letter in the alphabet. Below is a small portion of the table. On the left hand side is the value and on the right side is the letter it represents.

Fox example: This word is four bytes long.
Binary: 01000010010010010101010001010011

| Decimal: | 66 | 105 | 116 | 115 |
| :--- | :---: | :---: | :---: | :---: |
| ASCII: | B | i | t | s |

So the binary stream is the word "Bits".

This is only one example. Bits and bytes can hold all digital data at its lowest level.

| Binary | Hexadecimal |
| :---: | :---: |
| 0000 | 0 |
| 0001 | 1 |
| 0010 | 2 |
| 0011 | 3 |
| 0100 | 4 |
| 0101 | 5 |
| 0110 | 6 |
| 0111 | 7 |
| 1000 | 8 |
| 1001 | 9 |
| 1010 | A |
| 1011 | B |
| 1100 | C |
| 1101 | D |
| 1110 | E |
| 1111 | F |

## ASCII Character Codes Table

| Special Chars |  | Upper Case |  | Lower Case |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 9 | \t (Tab) | 65 | A | 97 | a |
| 10 | \n (NL) | 66 | B | 98 | b |
| 13 | $\mathbf{V r}$ (CR) | 67 | C | 99 | c |
| 32 | Space | 68 | D | 100 | d |
| 33 | 1 | 69 | E | 101 | e |
| 34 | = | 70 | F | 102 | f |
| 35 | * | 71 | G | 103 | 9 |
| 36 | \$ | 72 | H | 104 | h |
| 37 | \% | 73 | I | 105 | i |
| 38 | 8 | 74 | J | 106 | j |
| 39 | , | 75 | K | 107 | k |
| 40 | ( | 76 | 1 | 108 | 1 |
| 41 | ) | 77 | M | 109 | m |
| 42 | * | 78 | N | 110 | n |
| A2 | $\pm$ | \% | n | 111 | ¢ |
